

Local I.T. Company Makes a Difference to SMEs in Singapore

Singapore, March 3, 2008 – Technology is always deemed affordable only by companies with ample financial resources. A fellow SME & local I.T. setup, Doric Solutions LLP, launched a free technology tool to help local SMEs increase their office productivity without increasing their costs.

OurOfficePortal™, a SaaS (Software as a Service), is a suite of simple web office tools that equips office workers with organizing, sharing and collaboration capabilities. This is a service that does not require SMEs to buy a server and yet be able to utilize 'big office' technology.

Among the nine modules offered, the main functions in OurOfficePortal™ allow users to organize and share calendars, documents and contacts; send huge files; post & send digital memos, among the nine modules offered.

A similar traditional technology implementation within a SME office would easily cost more than S\$20,000.

"This initiative aims to encourage SMEs embrace technology in their businesses without any financial objections, so that they could be empowered to grow more effectively." says 36 year-old founder, Mr. Lester Neo.

OurOfficePortal™ FREE offers 10 user accounts and 1 GB disk space.

While free web solution is not a new idea, Doric Solutions LLP might be the first in Singapore to make this a real deal; with no trial period.

Please visit www.ourofficeportal.com for more details.
